

Energy Transfer was formed in 1996 with about 200 miles of natural gas pipelines and 20 employees. Since then, we have grown to be one of the largest and most diversified midstream companies in North America with more than 125,000 miles of pipelines and associated facilities in 44 states. We also have an international office in Beijing.

5x

Our more than 125,000 miles of pipelines could circle the Earth almost five times.

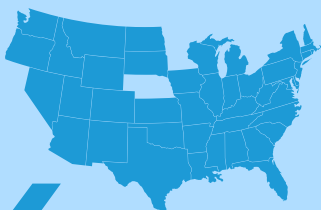

Our exports reached

59
COUNTRIES

in 2022

We are a leading midstream provider in the U.S. Our operations include the transportation of natural gas, petroleum, diesel, jet fuel, gasoline, propane, ethane and butane.

44 STATES

We own and operate more than 125,000 miles of pipelines and associated infrastructure in the U.S., with a strategic footprint in all of the major U.S. production basins.

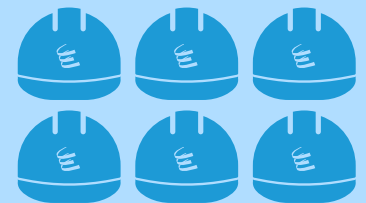

Purchasing
28 MW

of solar power from Maplewood 2 Solar Project in West Texas.

and

120 MW

of solar power from Eiffel Solar Project in Northeast Texas.

We are

11,000

employees strong.

NATURAL GAS

~ **12 BILLION**
MMBtus transported annually

=
~ **155,844,000**
homes powered annually

NGLs

1.1MM+ BARRELS PER DAY
of total export capacity

Our percentage of worldwide NGL exports is

~ **20%**

making us one of the largest NGL exporters in the world.
