

Energy Transfer was formed in 1996 with about 200 miles of natural gas pipelines and 20 employees. Since then, we have grown to be one of the largest and most diversified midstream companies in North America with more than 125,000 miles of pipelines and associated facilities in 44 states. We also have an international office in Beijing.

5x

Our more than 125,000 miles of pipelines could circle the Earth almost five times.

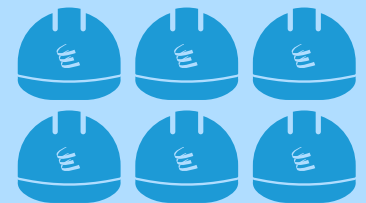

We are a leading midstream provider in the U.S. Our operations include the transportation of natural gas, petroleum, diesel, jet fuel, gasoline, propane, ethane and butane.
