TABLE OF CONTENTS

TO OUR STAKEHOLDERS

Welcome to our 2025 Corporate Responsibility Report. These annual reports provide an opportunity to showcase our Partnership's successes and highlight initiatives that underscore our commitment to safety, social responsibility and environmental stewardship. They also allow us to communicate this vital information to employees, unitholders, regulatory agencies and the financial community.

2025 was a milestone year for Energy Transfer, characterized by remarkable financial performance, including a **Partnership-record \$16 billion** in adjusted EBITDA and **record volumes** across our business segments. We also achieved our **strongest safety performance to date**, reflected in the **lowest OSHA total recordable incident rate (TRIR) in Partnership history (0.64)**. Additionally, we deployed artificial intelligence (AI)-based tools to enhance our incident management and damage prevention capabilities, launched a new initiative designed to improve driver safety and introduced an internal skills evaluation and quality program for employees.

Giving back to the communities where we live and work remains a core part of Energy Transfer's culture. Throughout the year, more than **2,500 employees** contributed over **5,800 volunteer hours** in support of nonprofits and community initiatives across the country. Energy Transfer also donated nearly **\$11.5 million** to **382 nonprofit** organizations across the United States, supporting a wide range of community, education, health and human services initiatives.

Together, these achievements reflect our commitment to creating long-term value through safe operations, environmental stewardship, community engagement and operational excellence.

Looking ahead, we remain committed to building on this momentum by operating safely and responsibly, investing in our people and communities, and advancing strategic growth opportunities across our network. As global demand for reliable, affordable energy continues to increase, Energy Transfer is well-positioned to deliver the infrastructure solutions needed to meet that demand while creating long-term value for our stakeholders.

Sincerely,

Tom Long,
co-CEO

Mackie McCrea,
co-CEO

WELCOME

NATIONWIDE FOOTPRINT WITH DIVERSE PRODUCT OFFERINGS

Energy Transfer is one of the largest midstream energy companies in North America. We safely and efficiently transport natural gas, natural gas liquids (NGLs), refined products and crude oil. Our U.S. footprint spans 44 states with approximately 140,000 of pipeline and associated facilities, assets in all of the major U.S. production basins and major import/export terminals on the East and Gulf Coasts. Internationally, our Latin America Regional Headquarters is strategically located in Panama City, Panama, and our business development office for the Asia-Pacific region is located in Singapore.

Keeping our world moving takes energy. Hundreds of millions of people around the world rely on oil and natural gas every day—and we're proud to be the company that delivers it.

ASSET OVERVIEW

FINANCIAL HIGHS

Achieved Partnership record **\$16 billion** of adjusted EBITDA, up 3% over 2024.* Net income attributable to partners was approximately **\$4.4 billion**.

RECORD VOLUMES

Moved record volumes across our interstate, midstream, NGL and crude pipelines. Also exported record NGLs from our Nederland and Marcus Hook Terminals.

**Reconciliations of non-GAAP measures to the comparable GAAP measure can be found at energytransfer.com*

GROWTH

Seeing renewed interest in natural gas transportation, we announced significant infrastructure projects to meet that demand. We began construction on the Hugh Brinson Pipeline, announced the Desert Southwest expansion of the Transwestern Pipeline, and placed our Nederland NGL Flexport Expansion into service. We also began construction on Frac IX, the ninth fractionator at our Mont Belvieu NGL complex, and two new processing plants in the Midland Basin.

SAFETY EXCELLENCE

Achieved our best performance in Partnership history with a **record-breaking OSHA TRIR of 0.64**.

EXECUTING STRATEGIC GROWTH TO MEET ENERGY NEEDS

Energy Transfer further strengthened its position as a cornerstone of the U.S. energy landscape. By leveraging our vast network across almost every major domestic production basin, we continued to successfully execute on our strategic growth plan that is focused on constructing high-demand infrastructure projects and expanding our reach into the rapidly evolving global energy and technology markets.

Energy Transfer and its consolidated subsidiaries supported a global workforce of **over 22,000 employees** last year and ranked **53rd on the Fortune 500** list of America's largest companies by revenue — our 19th year on the list. We continued to execute on our organic growth project backlog with the completion of expansions at our Nederland NGL terminal and to our processing facilities in the Permian Basin, and made significant strides on additional expansions to our natural gas processing and fractionation facilities. We also commenced construction of the large-scale Hugh Brinson natural gas pipeline project. To meet the growing demand for natural gas to support power plant and data center expansion, we signed agreements to provide natural gas to help power data centers and announced the Desert Southwest Pipeline Project to expand the Transwestern Pipeline, as well as an expansion to our Bethel natural gas storage facility.

MONT BELVIEU NGL COMPLEX EXPANSION

- Continued construction of Frac IX, the ninth fractionator at our Mont Belvieu NGL Complex, to meet increasing demand for NGL fractionation.
- The 165,000 barrels per day (Bbls/d) Frac IX is expected to be in service in Q4 2026, bringing total fractionation capacity at Mont Belvieu to **more than 1.3 million Bbls/d**.

HUGH BRINSON PIPELINE CONSTRUCTION

Began construction on the Hugh Brinson Pipeline, a major intrastate natural gas system designed to connect Permian Basin production to premier markets and trading hubs.

- Running from Waha and the Midland Basin to Maypearl, Texas, the project will provide critical takeaway capacity to support growing natural gas demand across the state.
- Phase I of the project, which consists of approximately **400 miles** of 42-inch pipeline, is now in commercial service and operating at its full Phase 1 capacity of **1.5 billion cubic feet per day (Bcf/d)**.
- Phase II, which includes the addition of compression, is expected to be in service during the first quarter of 2027.
- Upon completion, the bi-directional pipeline is expected to have the ability to transport approximately **2.2 Bcf/d** of natural gas from west to east and at least **1 Bcf/d** east to west.

2025 COMPANY HIGHLIGHTS

DESERT SOUTHWEST - TRANSWESTERN PIPELINE EXPANSION PROJECT

- Announced the Desert Southwest Pipeline Project, an expansion of the Transwestern Pipeline designed to increase the supply of natural gas to markets throughout Arizona and New Mexico from the Permian Basin.
- The project will provide reliable, affordable natural gas to meet the long-term energy needs of regional utilities and energy providers. This demand is driven by population growth, high-tech industry demand, and data center expansion.
- The approximately 520-mile, 48-inch pipeline is expected to provide up to **2.3 Bcf/d** of incremental natural gas transportation capacity.
- The pipeline is expected to be in service by the fourth quarter of 2029.

DATA CENTER AND POWER GENERATION AGREEMENTS

- Announced a long-term agreement with Oracle to supply natural gas to three of the cloud provider's U.S. data center sites. Energy Transfer will deliver approximately **900,000 million cubic feet per day (Mcf)** of natural gas via our extensive pipeline network.
- Entered into a 20-year binding agreement with Entergy Louisiana to provide at least **250,000 MMBtus** per day of firm transportation service via its Tiger Pipeline to fuel Entergy's power plants in North Louisiana.

NEDERLAND FLEXPORT NGL EXPANSION

- Entered service for ethane and propane in mid-2025, with ethylene export service following in December. These additions contributed to record exports from the Nederland Terminal for the fourth quarter of 2025.
- The expansion added up to **250,000 Bbls/d** of NGL export capacity at Nederland, providing the flexibility to load various products based on customer demand. Nederland remains the largest singularly owned above-ground crude oil storage facility in the U.S. and the second largest NGL export facility in the world.
- Construction is underway to expand the refrigerated storage capabilities at Nederland. This project is expected to increase butane storage capacity by one-third and double our propane storage capacity.

PERMIAN PROCESSING EXPANSIONS

- Commenced construction on the Mustang Draw I and Mustang Draw II processing plants in the Midland Basin. Each facility is designed with a processing capacity of **275 MMcf/d**, significantly expanding our footprint in one of the world's most productive energy regions.
- Mustang Draw I entered service in the second quarter of 2026, and Mustang Draw II is expected to be in service in the fourth quarter of 2026.
- Natural gas and NGL volumes from these plants will utilize Energy Transfer gas and NGL pipelines for takeaway from the Midland Basin.

2025 COMPANY HIGHLIGHTS

RECORD PERFORMANCE ACROSS OUR CORE BUSINESSES

Energy Transfer moved **record volumes** across the majority of its business segments in 2025 by optimizing our approximately 140,000 miles of pipeline and related facilities across 44 states. Our export terminals and pipeline assets moved NGLs, crude oil and other refined products through the U.S. and to approximately 70 countries and territories.

NATURAL GAS

- Our pipelines carried approximately **30% of the natural gas transported in the U.S.**
- Midstream gathering gas volumes were a **Partnership record in excess of 21,000 BBtu/d**, and we transported over 31,900 BBtu/d of natural gas via inter- and intrastate pipelines.
- Miles of natural gas pipeline: **~106,000**

CRUDE OIL

- Transportation volumes were a **Partnership record 7 million Bbls/d**, and our crude terminal throughput was 3.3 million Bbls/d.
- Miles of trunk & gathering lines: **~18,000**

NATURAL GAS LIQUIDS & REFINED PRODUCTS

- Exported a record number of NGLs out of our Nederland and Marcus Hook Terminals, a total of **375 million+ barrels** and an 8% increase over full year 2024.
- Fractionated volumes set a new **Partnership record**, averaging **1.1 million barrels per day** for full year 2025.
- Fractionation capacity: 1.15 million+ barrels per day
- NGL transportation volumes on our wholly owned and joint venture pipelines increased to a **record 2.3 million barrels per day**.
- Active refined products marketing terminals: **35**
- Miles of NGL pipelines: **~5,750**
- Miles of refined products pipelines: **~3,760**

**The above facts include approximate calculations, as well as joint venture interests.*

2025
BUSINESS MILESTONES

WE CONTINUE TO BE RECOGNIZED FOR OUR LEADERSHIP THROUGHOUT THE INDUSTRY

- **Energy Transfer ranked No. 53 on the 2025 Fortune 500 and No. 6 on Fortune’s Energy Sector Leader list.** This dual recognition reflected the strength of the Energy Transfer organization and the strategic execution of our long-term vision.
- **Energy Transfer was ranked No. 44 on Forbes’ Best Employers for New Grads 2025.** The recognition was a testament to Energy Transfer’s ongoing commitment to creating a culture where early-career talent can grow, make an impact and feel connected to a mission that matters.
- **Energy Transfer was named one of America’s Greatest Companies for 2025** by Newsweek magazine.
- **Executive Chairman Kelcy Warren and Co-CEOs Tom Long and Mackie McCrea were recognized in the Dallas 500**, an annual publication by D CEO profiling the most influential business leaders in Dallas-Fort Worth.

INDUSTRY RECOGNITION

RECORD FINANCIAL RESULTS*

In 2025, Energy Transfer generated a **Partnership record \$16 billion** of adjusted EBITDA, **up 3%** over 2024, as both domestic and international demand for our products and services remained strong. Distributable Cash Flow attributable to the partners of Energy Transfer, as adjusted, was **\$8.2 billion**.

Additionally, the Energy Transfer management team owns **approximately 10%** of Energy Transfer common units, a significant level of ownership interest compared to other companies. From January 2021 through December 2025, Energy Transfer insiders and independent board members purchased more than **48 million common units, totaling ~\$537 million**.

	2023	2024	2025
Adjusted EBITDA	\$13.7 billion	\$15.5 billion Up 13% over 2023	\$16.0 billion A 3% increase over 2024 Partnership record
Distributable Cash Flow Attributable to the Partners of Energy Transfer, as adjusted	\$7.6 billion	\$8.4 billion Up 10% over 2023	\$8.2 billion
Total Capital Expenditures**	\$2.4 billion (Growth \$1.6 billion + Maintenance \$762 million)	\$4.0 billion (Growth \$3.0 billion + Maintenance \$1.0 billion)	\$5.6 billion (Growth \$4.5 billion + Maintenance \$1.1 billion)
Distribution Yield	9.1%	~ 6.5%	~8.1%

*Reconciliations of non-GAAP measures to the comparable GAAP measure can be found at energytransfer.com

**Excludes capital expenditures related to SUN and USA Compression

2025 FINANCIAL HIGHLIGHTS

STABILITY OF EARNINGS

Our 2025 results reflected the strength of our assets and the benefit of having a diverse geographic footprint and multiple product offerings.

We moved record volumes across our interstate, midstream, NGL and crude pipelines. We also exported a record amount of NGLs out of our Nederland and Marcus Hook Terminals.

2025 EARNINGS BY BUSINESS SEGMENT

NGL & Refined Products – 26%

Midstream – 20%

Natural Gas – 20%

Crude Oil – 18%

Other – 16%

2025 FINANCIAL HIGHLIGHTS

STRONG SAFETY CULTURE

Maintaining the highest safety standards is essential to delivering excellence across our operations. We prioritize operational integrity by investing deeply in a culture of safety and compliance—a commitment backed by the **\$1.1 billion** we dedicated to maintenance initiatives in 2025 to ensure the ongoing safety of our assets.

ARTIFICIAL INTELLIGENCE

Operational excellence also entails utilizing cutting-edge technologies, such as AI and machine learning (ML), to derive data-driven insights that optimize asset performance and maintenance. Energy Transfer launched a new initiative to apply ML to rotating equipment to help predict potential failures, detect abnormal operations and identify performance deviations across our portfolio. AI and ML also support damage prevention, pipeline optimization and pipeline integrity. Additionally, an AI Hub is used to leverage Intelligent Character Recognition to extract and catalog large volumes of engineering and asset records, improving data accessibility and operational efficiency.

IMPROVING DAMAGE PREVENTION THROUGH AI: Energy Transfer deployed an AI-based damage prevention solution to mitigate risks associated with incorrect pipeline marking, a primary cause of injury, property damage and litigation. Historically, team members manually reviewed approximately **1,500 photos per day**. The new system utilizes computer vision, object detection and image classification to automatically scan uploaded photos for compliance and duplication issues. This allows our Operations Damage Control Prevention team to process photos **25 times faster**, significantly reducing exposure to accidents while identifying training opportunities for operators.

TRAINING

To achieve regulatory compliance, field employees undergo regular training in both classroom and on the job settings. This training is supplemented by routine field reviews to ensure work is being performed in accordance with company policies. We also recognize that continuous learning and improvement are essential to our success. To support that commitment, the Partnership leverages MyLearning, an internal enterprise-wide platform featuring more than **1,800 courses** covering topics ranging from corporate leadership to specialized technical operations.

By integrating advanced technology with a highly skilled workforce, we ensure that Energy Transfer remains a leader in safe, reliable, and responsible energy infrastructure.

MORE THAN 1,120 EMPLOYEES directly support our operations and engineering & construction performance and compliance by providing oversight of environmental, health and safety, technical services and integrity.

OPERATIONAL SAFETY

ORGANIZATIONAL EXCELLENCE AWARDS

Organizational Excellence Awards were introduced in 2023 to recognize employees who demonstrate exceptional leadership, engagement, innovative thinking and problem-solving skills within the realms of Operations, Measurement and Engineering & Construction. Selections are made through a nomination process highlighting employee qualities such as proactive risk management, environmental compliance, performance evaluation, swift decision-making, fostering continuous improvement and upholding a strong commitment to safety and the Energy Transfer safety culture.

Award categories include:

- Outstanding Innovator Award
- Continuous Improvement Award
- Collaboration and Teamwork Award
- Operations Leadership Award
- E&C Leadership Award
- Measurement Leadership Award

OPERATIONAL SAFETY

ODESSA TRAINING CENTER

Energy Transfer's Odessa Training Center (formerly the West Texas Operations Training Center) serves as a cornerstone of our commitment to technical excellence and workforce safety. The facility provides a dedicated environment for our operators, technicians and engineers to master the skills essential for maintaining safe, reliable and efficient midstream operations. By integrating rigorous classroom instruction with hands-on labs featuring real-world field equipment, the Odessa Training Center ensures employees develop high levels of competency and consistency. Our curriculum spans the operational spectrum, from mechanical and electrical fundamentals to advanced process automation. Through strategic partnerships with industry leaders, we provide specialized OEM training on-site and bring world-class technical expertise directly to our employees. This investment in continuous learning empowers our people to lead the industry with operational integrity.

More than 500 employees completed a total of 66 courses at the Odessa Training Center.

EMPLOYEE VOLUNTEER EMERGENCY RESPONSE TEAMS

Energy Transfer's employee volunteer emergency response teams play a critical role in supporting safe and reliable operations across the Partnership's facilities. Comprising employee volunteers at the Mont Belvieu Facility, Nederland Terminal, Houston Fuel Oil Terminal and Marcus Hook Terminal, these highly trained teams are prepared to respond quickly and effectively to a wide range of industrial emergencies. Because team members work on-site every day and possess deep familiarity with facility operations, equipment and layouts, they can provide immediate response capabilities to help minimize incident escalation and support the protection of employees, communities and critical infrastructure.

Employee volunteers undergo extensive specialized training and regularly train together at Energy Transfer sites to strengthen coordination and preparedness. Teams also work closely with local city and county fire departments, emergency responders and mutual aid organizations in their respective areas. Many team members also participate in and earn certifications through the Texas A&M Engineering Extension Service (TEEX) Annual Fire Training Schools in College Station, Texas, preparing them for a variety of industrial emergency scenarios. Team members may also pursue advanced specialties such as rope rescue and hazardous materials response, further enhancing Energy Transfer's emergency preparedness capabilities and reinforcing a strong culture of safety across the organization.

Active Members:

- Houston Fuel Oil Terminal: **26**
- Mont Belvieu Facility: **46**
- Marcus Hook Terminal: **74**
- Nederland Terminal: **37**

OPERATIONAL SAFETY

CYBERSECURITY TRAINING

Building a culture of cybersecurity awareness is a key component of our risk management strategy. Employees with access to company systems are required to complete annual cybersecurity training and certify their understanding of our cybersecurity policies each year. To reinforce awareness and preparedness, we conduct monthly phishing simulations that help employees identify and report potential threats while enabling us to continuously evaluate and strengthen our security defenses. We also offer targeted, role-based cybersecurity education to employees whose responsibilities expose them to specific security risks or regulatory requirements.

To further protect sensitive information, our IT team receives training in secure management and protection of personally identifiable information. Technical safeguards, including user access controls and multifactor authentication, are implemented to reduce the risk of unauthorized access to critical systems and data. Employees are also expected to maintain strong password security practices and comply with established information security requirements.

*An internal skill evaluation and qualification program called **MyPath** was developed with:*

- Input of **117** subject-matter experts
- Over **13** disciplines
- Inclusion of more than **1,500** tasks associated with pipeline operations

OPERATIONAL SAFETY

EVERY STEP, EVERY DAY: OUR COMMITMENT TO EXCELLENCE

Safety reached new heights at Energy Transfer in 2025. The Partnership achieved a **record-breaking OSHA TRIR of 0.64** – the best performance in Partnership history and our third consecutive year of improvement. This momentum extended to our driving safety, where we lowered our Preventable Vehicle Incident Rate (PVIR) to **0.83**. Both metrics represent a **20% improvement** over our three-year averages. This continues a decade-long trend of excellence, during which we have reduced our **TRIR by nearly 62%** and our **PVIR by 46%**.

These achievements were embodied in our 2025 Safety Awareness Campaign, “Every Step, Every Day,” which promoted sound judgment, proactive planning and the avoidance of at-risk behaviors.

We also launched strategic new initiatives to improve workforce safety, including DriverCare Connect, a program designed to reduce preventable vehicle incidents (PVIs); the Field Safety Inspector Program to provide dedicated safety oversight and support on the Hugh Brinson Pipeline project; and an updated Quality Job Review and Engagements App.

Our OSHA Total Recordable Injury Rate (0.64) was the lowest in Partnership history, reflecting our unwavering commitment to achieving a zero-incident workplace.

We continue to promote safety through popular initiatives like our Near Miss and Good Catch Program for all of our operations, and our annual Crude Trucking “Rodeo,” where drivers from our crude trucking division compete in multiple challenges to demonstrate their top-notch driving skills.

To further align our goals, safety leaders gathered in October 2025 at a safety summit to establish priorities, share best practices and identify areas for improvement. This collaborative environment ensures our safety culture remains a personal priority for every employee, every day.

Energy Transfer launched DriverCare Connect, a data-driven initiative for our 7,200 drivers behind the wheel of company vehicles. After analyzing the metrics and data, the Operations Support Safety Team developed a creative, real-time solution: weekly safety reminders delivered straight to employees’ mobile phones. The messages cover topics such as distracted driving, maintaining a safe following distance and staying rested to prevent drowsiness. Each week’s message draws from real data, observed behaviors and lessons learned. This direct line of communication has become a vital tool in our mission to ensure every driver returns home safely at the end of their shift.

PERSONAL SAFETY

SAFETY INCIDENT RATES

	2023	2024	2025
TRIR (Total Recordable Incident Rate)	0.77 Based on 18,906,814 hours worked. The TRIR for contractors working on major projects was 0.48.	0.70 A 9% decrease and a new Partnership record. Based on 20,370,557 hours worked.	0.64 An 8.5% decrease from 2024 and a new Partnership record. Based on 22,155,807 hours worked.
PVIR (Preventable Vehicle Incident Rate)	0.96 Based on 148,287,509 miles driven.	1.04 Based on 150,131,783 miles driven. 52% of vehicle incidents were due to hitting fixed objects while arriving or departing. The on-the-road driving PVIR, excluding these incidents, was 0.50.	0.83 A 20% decrease from 2024. Based on 175,813,307 miles driven.
DART (Days Away, Restricted or Transferred Incident Rate)	0.44 Based on 18,906,814 hours worked.	0.47 Based on 20,370,557 hours worked.	0.42 Based on 22,155,807 hours worked.

NEAR MISS AND GOOD CATCH PROGRAM & SAFETY ENGAGEMENTS

	2023	2024	2025
Safety Engagements and Quality Job Reviews	10,128	19,021	21,720
Near Miss and Good Catch Program	4,085	4,947	5,883

Energy Transfer is leveraging AI to enhance its Near Miss and Good Catch incident management program and help identify potential hazards more quickly. The AI-based tool analyzes employee reports and categorizes the hazard exposures identified, providing near-real-time insights into emerging safety trends. This allows teams to more efficiently track and analyze potential risks and take action to address hazards, significantly reducing the time from identification to elimination.

PERSONAL SAFETY

CRUDE TRUCKING

Throughout the year, **417 drivers** safely transported approximately **52 million barrels** of lease crude, representing higher throughput than in 2024. They also covered **22.9 million miles** between production sites and pipeline injection points, refineries and storage terminals.

Supervisory engagement shifted to emphasize direct field observation through employee ride-alongs. While formal employee evaluation counts decreased, ride-alongs **increased 146%** compared to 2024, reflecting a deliberate focus on hands-on coaching and real-time driver development.

	2023	2024	2025
Number of Truck Drivers	423	424	417
Crude Truck Miles	22 million miles	22 million miles	22.9 million miles, a 3.2% increase over 2024
Crude Hauled	47 million barrels	49 million barrels	52 million barrels, a 6.1% increase over 2024
Crude Truck Spill Rate	0.000160%	0.000150%	0.000171%
Driver Safety Evaluations	3,342	5,553	4,281
Internal DOT Truck Audits	1,665	2,337	2,657, a 13.7% increase over 2024
DOT Motor Safety Ride-Alongs ²	298	316	778, a 146% increase over 2024

PERSONAL SAFETY

MILLION MILE CLUB

Energy Transfer's Million Mile Club recognizes crude oil truck drivers who have driven at least one million miles without a single preventable motor vehicle accident. In 2025, four operating areas earned Million Mile Club recognition, up from one in 2024—a fourfold increase in areas achieving zero preventable motor vehicle accidents.

CORPORATE SECURITY TRAINING

Energy Transfer provides employees with a broad range of personal security and safety training programs designed to help maintain safe operations, protect facilities and personnel, and prepare employees to respond effectively to potential security threats. Online training is available through our MyLearning platform, featuring courses on topics such as facility security, maritime and DOT security compliance, security screening and inspections, workplace violence prevention, conflict resolution and de-escalation, TSA security awareness, and hazardous materials security.

We provide active assailant preparedness training, which covers responding during rapidly evolving incidents, interacting with law enforcement, and fostering a culture of preparedness that can help improve employee safety outcomes. To support employees traveling for business, the Partnership's SafeTransfer Travel Security Program partners with Crisis24 to provide global travel risk monitoring, real-time travel alerts, emergency response services and access to a 24/7 security hotline.

The International Liquid Terminals Association (ILTA) recognized Energy Transfer with the Safety Excellence Award, for its commitment to safety excellence, from leadership engagement to training programs.

PERSONAL SAFETY

ENVIRONMENTAL MANAGEMENT

Energy Transfer is dedicated to responsible environmental management through a range of initiatives. This includes the detection and recovery of products through optical gas imaging (OGI) inspections, aerial surveillance, acid gas injection (AGI) and our proprietary Dual Drive compression technology.

EMISSIONS REDUCTION

- Energy Transfer's **28** product recovery technicians performed **4,436 OGI inspections** across **995** gathering and boosting facilities. This was an increase of **5** technicians, **1,036** inspections and **160** facilities over 2024.
- Energy Transfer captured approximately **67,300 metric tons of carbon dioxide** through AGI technology installed at treating and processing facilities located in New Mexico, West Texas and South Texas,⁵ a **42.6% increase** over 2024.

DUAL DRIVE

Our proprietary Dual Drive compression technology offers the ability to switch compression drivers between an electric motor and a natural gas engine, which allows us to reduce our Scope 1 carbon dioxide emissions and other priority pollutants such as NOx and VOC.

This one-of-a-kind compression technology allowed us to operate using electric power on our units approximately **67% of the time**, reducing annual carbon dioxide emissions by over **532,000 tons**.

Twenty-three units were operated by third parties, expanding the Dual Drive footprint beyond West Texas into Virginia and Wisconsin. These third-party units reduced annual carbon dioxide emissions by an additional **152,238 tons**.⁶

2025	
Energy Transfer's Emissions Saved Using Dual Drive Technologies	• NOx 667 tons • CO 367 tons • VOC 252 tons • CO₂ 532,865 tons
Estimated Third Parties' Emissions Saved Using Dual Drive Technologies	• NOx 191 tons • CO 105 tons • VOC 72 tons • CO₂ 152,238 tons

ENVIRONMENTAL MANAGEMENT

PRODUCT RECOVERY AND LOSS MITIGATION

We significantly expanded our next-generation technology suite, moving beyond standard regulatory compliance toward a comprehensive Product Recovery and Loss Mitigation framework. By utilizing advanced sensors and real-time data, we identify and resolve potential issues with unprecedented speed and accuracy.

*Energy Transfer and Vanguard Pipeline Inspection received the “**Most Innovative 2025**” award at the Texas Oil & Gas Association’s Energy Elevated Technology Showcase for their collaboration on a joint aerial methane detection project.*

- **Aerial Methane Leak Detection**

Using high-fidelity laser scanning, our internal methane detection flight program identifies “Points of Interest” (POIs) across tens of thousands of miles of pipeline in a fraction of the time required by traditional foot patrols.

- **Continuous Fence-Line Monitoring**

We deployed a **network of continuous monitoring sites** that provide data updates every 15 minutes. This “always-on” approach uses multi-source modeling to alert operations teams via email within three hours of an anomaly. At our most engaged sites, this rapid response capability has driven an **80%+ reduction in emissions**.

- **Acoustic & Laser Quantification**

Once a potential leak is identified, our technicians utilize handheld TDLAS (Tunable Diode Laser Absorption Spectroscopy) devices and Acoustic Flow Meters. These tools allow technicians to “hear” and “see” gas movement inside sealed equipment, such as compressor rod packings and isolation valves, ensuring maintenance is only performed when and where it is truly needed. This also allows technicians to maintain a safe distance during inspections by removing the need to physically engage the equipment.

ENVIRONMENTAL MANAGEMENT

NEW POWER GENERATION FACILITIES

- Energy Transfer is spending approximately **\$212 million** on new power generation facilities (115 MW) to make our critical transportation systems more reliable in the areas where we have significant electricity shortages or intermittent outages.
- All facilities are powered by natural gas and located in Texas.
- Two sites placed in service in 2025 are currently operational.
- Five more facilities are expected to be placed in service throughout 2026.

CO₂e SEQUESTRATION

Energy Transfer's support of conservation projects in Ohio and Louisiana through its partnership with Ducks Unlimited helped to sequester more than **368 metric tons** of CO₂e in 2025.

CO₂e includes more greenhouse gases than just CO₂.

- Ohio - **219 metric tons** of CO₂e
- Louisiana - **150 metric tons** of CO₂e

RENEWABLE NATURAL GAS (RNG)

Transported nearly **12 billion cubic feet** of RNG in 2025, an average of **~33,100 Mcf/day** and a **13.1% increase** from 2024, through **24** RNG plants/interconnects.

	2023	2024	2025
Total RNG Plants/Interconnects	19	21	24
Total RNG Transported	7 bcf	10.7 bcf	12.1 bcf

ENVIRONMENTAL MANAGEMENT

WATER MANAGEMENT

Wastewater from our gathering and boosting assets is processed to remove oil and condensate (NGLs) from the water before disposal, providing both environmental benefits and revenue opportunities. We broke the **1-million-barrel-per-year** mark for oil recovered from water management – an 82% increase over 2024. This was primarily due to full-year oil recoveries from WTG Midstream Holding, LLC’s assets following Energy Transfer’s acquisition of that company in 2024. We also saw a **61% increase** in revenue over 2024 despite oil prices dropping by 15% year over year.

- Successfully recovered **1,094,792** barrels of oil and condensate, up from **601,883** barrels in 2024 – an 82% increase.
- Since 2018, we have recovered a total of **2.3 million barrels** of oil and condensate, which translates to approximately **\$107.3 million** in revenue.

Wastewater Oil Recovery

SOLAR POWER

Energy Transfer uses a diversified mix of energy sources to operate its assets, including solar power when economically beneficial to do so. In 2025, Energy Transfer purchased more than **242,000** megawatt hours of solar power from two solar panel-powered metering stations – the Maplewood 2 Solar Project in Pecos County, Texas, and the Eiffel Solar Project in Paris, Texas.

	2024	2025
Total solar power purchased to serve Energy Transfer’s load	172,672 megawatt hours	242,189 megawatt hours A 40.3% increase over 2024
Number of solar panels utilized by Energy Transfer	37,112	36,720

ENVIRONMENTAL MANAGEMENT

CONSERVATION THROUGH MEANINGFUL ACTION

Energy Transfer believes that responsible energy delivery and environmental stewardship are inseparable. Our commitment to safeguarding the natural resources and ecosystems where we live and work is a core component of our operational philosophy. We reached a significant milestone in this mission in 2025, donating more than **\$1.6 million** to conservation programs.

We recognize that our presence carries a responsibility to the land. Whether we are restoring fragile wetlands, reforesting urban corridors, or protecting critical wildlife habitats, we take a proactive approach by forging strategic partnerships with leading environmental organizations. These targeted investments go beyond regulatory compliance; they reflect our dedication to minimizing our environmental footprint and leaving a lasting, positive legacy for the generations that follow.

MITIGATION CREDITS

Energy Transfer spent nearly **\$11.5 million** on wetland mitigation and species mitigation in Texas and Alabama.

\$9,972,480

CONSERVATION

2025 CONSERVATION HIGHLIGHTS

Community Tree Planting

Energy Transfer is a sponsor of Texas Trees Foundation's "Branching Out" program, which aims to create healthier communities by planting trees at Dallas parks and schools. Energy Transfer donated **\$100,000** to the program, and employee volunteers planted 170 trees spread across Anderson Bonner Park, Kingsbridge Park, and F.P. Caillet Elementary School. We also donated **\$75,000** to Wildlife Habitat Council (now Tandem Global) for the planting of **175 trees** at J.S. Clark Elementary School in Shreveport, Louisiana, and **\$30,000** to Trees for Houston for the planting of 80 trees at Chinquapin Preparatory School.

Wetlands Restoration

Ducks Unlimited completed construction on the initial phase of its project at the J.D. Murphree Wildlife Management Area, enhancing wetland habitat on **1,700 acres** of coastal marsh in Jefferson County, Texas. The project, which Energy Transfer supported through a **\$250,000** donation made in 2022, is part of a larger effort to restore the Chenier Plain, a vital ecosystem stretching from Galveston, Texas, to Vermilion Bay, Louisiana.

Coconino County Forest Restoration

Energy Transfer contributed **\$1.3 million** to support forest restoration efforts in Coconino County, Arizona. This significant investment is aimed at reducing the risk of catastrophic wildfires, protecting vital watersheds and enhancing the overall health of the region's ponderosa pine forests.

Biodiversity & Forest Health

Energy Transfer made a three-year, **\$300,000 commitment**, of which **\$100,000** was paid in 2025, to the National Fish and Wildlife Foundation to conserve longleaf pine forests, one of the most biodiverse ecosystems in the world. Stretching from Virginia to East Texas, these forests provide critical habitat for unique wildlife and rely on periodic fires to maintain their rich biodiversity of plants and animals.

Wildlife Protection & Habitat Restoration

Energy Transfer donated **\$13,000** to the Partnership of the Delaware Estuary to help protect Delaware's waterways and strengthen local ecosystems. Energy Transfer and the Sunoco Foundation have contributed over **\$370,000** to the organization since 2009. We also donated **\$10,000** to Tri-State Bird Rescue & Research in 2025, a nonprofit organization that rehabilitates injured, orphaned, and contaminated wild birds on the Delmarva Peninsula.

Restoration of Rights-of-Way

Restoring and maintaining pipeline rights-of-way is a critical part of our operations, ensuring the long-term integrity of our infrastructure while respecting the needs of landowners and surrounding communities. Energy Transfer works closely with landowners to understand their expectations, address concerns, and implement best practices for land restoration. This includes erosion control measures, native vegetation reseeding, and habitat preservation efforts that help maintain the natural landscape while protecting pipeline integrity.

CONSERVATION

\$11.48
million
in donations

30% Health & Medical

14% Environmental

14% Community & Economic Growth

12% Poverty, Hunger & Abuse

9% Children's Causes

7% Education & Special Needs

7% Disaster Relief

7% First Responders & Veterans

2025 charitable donations supported **382 nonprofit organizations** across the U.S. totaling approximately **\$11.48 million** – our highest amount to date. A sampling of highlights follows.

For a more complete look at our charitable giving organizations, please [click here](#).

Community & Economic Growth

We were proud to contribute more than **\$1.6 million** in donations to parks, museums, and the arts in communities where we do business. This includes **\$75,000** to the Whitaker Center for Science & the Arts, Central Pennsylvania's premier destination for educational, creative, and cultural experiences; **\$60,000** to the Woodall Rogers Park Foundation, whose mission is to provide free programming and education opportunities in our headquarters city of Dallas; and nearly **\$57,000** to the Houston Museum of Natural Science.

Poverty & Hunger

Reducing food insecurity is one of our core principles for corporate giving. Last year, we donated more than **\$1.5 million** to food banks and meal distribution organizations in Texas, Louisiana, North Dakota, Oklahoma, and Pennsylvania. We were proud to make our annual **\$250,000** donation to Philabundance, an organization dedicated to ending hunger in the greater Philadelphia region. Over the last decade-plus, the Energy Transfer/Sunoco Foundation has contributed more than **\$3.4 million** to provide fuel needed for Philabundance's fleet of delivery vehicles.

SOCIAL RESPONSIBILITY

First Responders & Veterans

Energy Transfer is proud to stand behind our nation's heroes through strategic partnerships with organizations dedicated to military families and first responders. We donated **\$38,000** to the Folds of Honor Foundation to support educational scholarships for the spouses and children of fallen or disabled service members. Our commitment continued with a **\$31,500** contribution to the Stephen Siller Tunnel to Towers Foundation, assisting their mission to provide mortgage-free homes to Gold Star Families and injured veterans. Additionally, we were honored to maintain our longstanding support of the Delaware County Veterans Memorial Association through a **\$50,000** sponsorship of their Veterans Memorial Ice Rink in Newtown Square, Pennsylvania, and a **\$5,000** donation to their annual Freedom Medal Dinner.

Disaster Relief

As part of our Annual Disaster Giving Partnership with the American Red Cross, the Energy Transfer/Sunoco Foundation donated **\$500,000** to support immediate relief efforts for crises across the country, as well as **\$200,000** to support their general operations. In addition to our national outreach, we responded directly to local emergencies, providing **\$100,000** to The Salvation Army following the devastating flooding in the Texas Hill Country, as well as **\$15,000** to local volunteer fire departments involved in search and rescue operations. To further support the Kerrville, Texas community, our employees also provided an in-kind donation of more than 1,200 pairs of brand-new shoes to ensure children impacted by the tragedy received immediate and practical aid.

Children's Causes

We donated **\$280,000** to Mercy Street Dallas, a nonprofit organization that offers mentoring and sports programs for inner-city youth. Our contribution helped Mercy Street Dallas open its "Dream Center," a transformative hub for families in West Dallas. We were also proud to support the Momentous Institute in Dallas, an organization dedicated to innovative mental health services, education, and professional training to strengthen children, families, and communities. Our **\$45,000** donation helped the school create a "Sensory Room," a space designed for emotional regulation, learning readiness, and whole-child development.

SOCIAL RESPONSIBILITY

Education & Special Needs

Through our long-term partnership with Yellowstone Schools in Houston's Third Ward, Energy Transfer continues to sponsor a group of students we have supported since kindergarten. We furthered this commitment in 2025 with a **\$50,000** donation to support their ongoing academic journey. Our commitment to specialized learning also included a **\$165,000** contribution to My Possibilities in Plano, Texas, for a new multi-sport complex. This safe, accessible space provides vital opportunities for adults living with intellectual and developmental disabilities to grow, learn, and thrive through athletic and social engagement.

Health & Medical

Energy Transfer and Sunoco donated **\$2.1 million** to the University of Texas MD Anderson Children's Cancer Center as part of our annual workplace giving campaign. Every dollar donated directly supports vital cancer research and patient care initiatives. Since 2014, Energy Transfer, Sunoco, and our employees have collectively donated more than **\$19 million** to MD Anderson Children's Cancer Center. We also donated **\$500,000** to Children's Medical Center Foundation in Dallas and **\$150,000** to the Houston Methodist Hospital Foundation.

Environmental

See the Conservation section, [pages 27 and 28](#).

SOCIAL RESPONSIBILITY

EMPLOYEE VOLUNTEERISM

Community engagement is a core part of Energy Transfer's culture and a reflection of our commitment to being a responsible corporate citizen. Through volunteer service, charitable initiatives and community partnerships, our employees help strengthen the communities where we live and work.

2,500+
EMPLOYEES

25%
INCREASE

5,800
VOLUNTEER HOURS

9.4%
INCREASE

Whether assisting veterans, supporting families in need, enhancing local environments or contributing to community development efforts, employees demonstrated a shared commitment to making a meaningful difference. These efforts generate impact far beyond the hours served. By investing in the well-being of our communities, our employees help create opportunities, strengthen local connections and contribute to positive, lasting change.

SHARE THE SHOES: RESPONDING TO THE TEXAS HILL COUNTRY FLOODS

Following devastating flooding in the Texas Hill Country in July 2025, Energy Transfer pivoted its annual Share the Shoes campaign to provide immediate relief to the Kerrville, Texas community. While the program typically serves the Dallas, Houston, and San Antonio areas, our employees felt a call to action for those impacted by the tragedy. In a remarkable show of support, employees company-wide donated more than 1,200 pairs of brand-new shoes that were distributed directly to kids, teens and adults in Kerrville. This initiative ensured that as families began the difficult work of rebuilding, they could step forward with confidence and comfort.

SOCIAL RESPONSIBILITY

RESTORATION TEAM

After the impact of Hurricane Beryl, Energy Transfer employees in Houston partnered with the Restoration Team to help restore a local home. Volunteers worked throughout the day repairing gutters, fixing windows, painting, and completing extensive yard work, including clearing fallen limbs and overgrown brush to support the home's recovery.

JONATHAN'S PLACE

Employees supported the mission of Jonathan's Place, which provides a safe place for abused and neglected children, by volunteering at three holiday events: Valentine's Day, Halloween and Christmas.

LOYALHANNA LAKE CLEANUP

Our operations group participated in a lake cleanup at Loyalhanna Lake in Westmoreland County, PA. Employees spent the day removing debris and litter to help keep the lake clean through the winter and during high-water events that often bring in additional waste. From collecting trash to clearing larger debris, every effort made a meaningful impact.

INFANT CRISIS SERVICES

Our Oklahoma City team stepped up to support Infant Crisis Services, packing **375 BabyMobile food boxes**. These efforts helped address transportation barriers, ensuring families could access essential supplies for their babies and toddlers regardless of their location.

WREATHS ACROSS AMERICA

Approximately **200 employees** volunteered with Wreaths Across America in December, supporting ceremonies at 20 cemeteries nationwide. From Hawaii to Philadelphia, employees honored our nation's heroes by placing wreaths on the graves of those who served and protected our country.

PROMOTING STEM

Energy Transfer is proud to be an annual sponsor of Energy Day, a K-12 educational festival in Houston showcasing exhibits focused on science, technology, engineering, and mathematics (STEM). Energy Transfer was a Gold Sponsor of Energy Day 2025 at the \$11,500 level, with employees hosting a golf-themed exhibit featuring a mini golf course in our tent and posters highlighting how golf relies on oil and natural gas products.

SOCIAL RESPONSIBILITY

NATIVE AMERICAN RELATIONS

Our cooperation with and support of Native American Tribes across our footprint continues to be an important focus. 2025 highlights include:

	2023	2024	2025
Total spent on easements with 17 Native American Tribes across seven states	\$19.8 million	\$19.8 million	\$19.8 million
Total paid to the Navajo Tribal Utility Authority in Arizona to purchase power to sustain our local operations	\$7.4 million	\$5.3 million	\$6.9 million
Total spent on scholarships to support Native American schools in New Mexico and Arizona	\$38,000*	\$29,000	\$29,692
Three Affiliated Tribes (MHA Nation) Support	\$56,077	\$36,400	\$118,500

**This number reflects a change from the 2023 report. The number was updated after the report was published.*

SOCIAL RESPONSIBILITY

HIRING HEROES – OUR COMMITMENT TO A VETERAN WORKFORCE

Our commitment to supporting veterans is core to our Partnership. Nowhere is this better illustrated than through Hiring Heroes, our veteran employment initiative that is part of our ongoing effort to ensure a skilled, reliable workforce. Hiring Heroes prioritizes the pre-qualification of pipeline inspection and survey companies for our construction projects that actively recruit and train individuals transitioning from active-duty military service into civilian careers. Veterans bring invaluable strengths to the oil and gas industry, including discipline, attention to detail, timeliness, and a strong work ethic — qualities that align closely with the demands of building large infrastructure projects.

Through this program, we work with our vendors to ensure a targeted, minimum staffing level on construction projects, providing stability and opportunity for transitioning service members. We are proudly starting this journey with inspection services on the Hugh Brinson Pipeline Project, and we look forward to expanding it to include additional roles as training pathways continue to develop.

BUY AMERICAN

We believe in supporting American jobs and manufacturing. Buying American-made products is a top priority as stated in our Procurement Guidelines:

It is the intent of Energy Transfer Partners for its capital projects that a priority be given to the procurement of any component of the projects to be manufactured by U.S. registered companies located within the borders of the U.S. and using U.S. employees. Matters of cost, item availability and project schedule will be the key factors in evaluating if U.S. materials can be selected for the project. With that discretion given to the project and procurement teams, a weight is to be given to a 'Buy American' approach.

COMPLIANCE TRAINING

We maintain a companywide compliance training program designed to promote ethical conduct, regulatory compliance, workplace respect and responsible business practices across our organization. Employees receive training on a range of topics relevant to their roles and responsibilities, including business ethics, anti-harassment, cybersecurity, regulatory compliance, anti-corruption, insider trading and other risk-based compliance matters.

In addition to broad-based training, we provide targeted training and awareness initiatives for employees in specific functions or business areas, as appropriate.

SOCIAL RESPONSIBILITY

TAX CONTRIBUTIONS*

	2023	2024	2025
Income tax payments	\$111 million	\$70 million	\$115 million**
State property taxes	\$634 million, including: • \$235 million in Texas • \$89 million in Ohio • \$83 million in Louisiana • \$63 million in Oklahoma	\$681 million, including: • \$266 million in Texas • \$89 million in Ohio • \$88 million in Louisiana • \$60 million in Oklahoma	\$740 million, including: • \$320 million in Texas • \$87 million in Ohio • \$87 million in Louisiana • \$65 million in Oklahoma
Motor fuel and sales/use tax	\$173 million, including: • \$71 million in Texas • \$24 million in New York • \$13.4 million in Louisiana • \$11.3 million in Maryland	\$167.5 million, including: • \$91.8 million in Texas • \$12.2 million in Louisiana • \$10 million in New Mexico • \$6.6 million in Maryland	\$212.3 million, including: • \$135.3 million in Texas • \$13 million in New Mexico • \$12.5 million in Maryland • \$7.9 million in Louisiana

*Excludes taxes paid by Sunoco and USA Compression

**Excludes cash paid to non-governmental third parties for purchases of Federal Tax Credits for the 2025 tax year

According to the Texas Oil & Gas Association, the Texas oil and natural gas industry paid **\$27 billion** in state and local taxes and state royalties in fiscal year 2025 — the second-highest total in state history. That translates to nearly **\$74 million** every day supporting Texas public schools, universities, roads, first responders and other essential services.

TAXES

PUBLIC AWARENESS MAILING

Our annual public awareness mailing reached **nearly 700,000 stakeholders** across our footprint. The mailing reached:

- **408,386** Excavators
- **244,510** Affected Public
- **39,503** Emergency Officials
- **5,383** Public Officials

811 – PROMOTING SAFE DIGGING

To celebrate the kickoff of National Safe Digging Month in April, Energy Transfer displayed **54 Call Before You Dig banners** at our locations across the country.

ENERGY TRANSFER'S PIPELINE LOCATOR

Nearly **1,500** people utilized this feature on our website in 2026, an average of almost **125** users per month.

SUPPORTING FIRST RESPONDERS

We donated **\$451,333** to help first responder organizations across **14** states.

BUILDING RELATIONSHIPS WITH EMERGENCY RESPONDERS

We sponsored and participated in **554 liaison meetings** across our pipeline system and educated **25,551 stakeholders**, including:

- **8,998** Emergency Officials
- **3,409** Public and School Officials
- **12,482** Excavators
- **662** Others

EMERGENCY MANAGEMENT TRAINING

We conducted hundreds of emergency response exercises, including:

- **95** annual OPA 90 emergency response exercises
- **29** annual CFR 192/195 regulated facilities emergency response exercises
- **7** annual H₂S emergency response exercises
- **25** geographic response strategies
- **94** unannounced emergency procedures exercises

COMMUNITY COMPLAINTS

Landowners can contact their land agent at any time during construction of a pipeline or throughout its operations to express grievances. During large new construction projects, they can also call the project's hotline number or write to the project's general email to express a complaint. Grievances are reviewed and addressed in a timely manner.

PUBLIC AWARENESS

FORWARD LOOKING STATEMENT/LEGAL DISCLAIMER

Certain matters discussed in this report, excluding historical information, include forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. Statements using words such as “anticipate,” “project,” “expect,” “plan,” “goal,” “forecast,” “target,” “estimate,” “intend,” “continue,” “could,” “believe,” “may,” “will” or similar expressions help identify forward-looking statements. Although we believe such forward-looking statements are based on reasonable assumptions and current expectations and projections about future events, no assurance can be given that such assumptions, expectations or projections will prove to be correct. Forward-looking statements are subject to a variety of risks, uncertainties and assumptions. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, our actual results may vary materially from those anticipated, estimated, projected, forecasted, expressed or expected in forward-looking statements since many of the factors that determine these results are subject to uncertainties and risks that are difficult to predict and beyond management’s control. For additional discussion of risks, uncertainties and assumptions, please see “Part I - Item 1A. Risk Factors” in our most recent Annual Report on Form 10-K, and “Part II - Item 1A. Risk Factors” in our most recent Quarterly Reports on Form 10-Q, which are available on our website at www.energytransfer.com or through the SEC’s EDGAR system at www.sec.gov.

Forward-looking statements speak only as of the date they were made, and except to the extent required by law, we undertake no obligation to update any forward-looking statement because of new information, future events, or other factors. Any references to our website are for readers’ convenience only. We are not incorporating this report by reference into any other document posted to www.energytransfer.com or www.sec.gov and we are not incorporating any other document posted on either website to this report.

This report may also include links to websites owned and operated by third parties, which are provided for readers’ information and convenience only. We are not responsible for these websites or their content.

Certain data included in this report has been derived from external sources, including independent industry publications, government publications, and other published sources. While we believe that these sources are reliable, we have not independently verified, and take no responsibility for, the accuracy or completeness of any data derived from these sources.

FOOTNOTES

1. Our public awareness plan is consistent with federal pipeline safety regulations. The recipients for our annual public awareness mailer differ every year and are based on the industry’s recommended practices—annual for emergency response organizations and excavators, biennial for the affected public, triennial for public officials. (page 13)
2. In 2025, supervisory engagement shifted to emphasize direct field observation through employee ride-alongs. While formal employee evaluation counts decreased, ride-alongs increased 146% compared to 2024, reflecting a deliberate focus on hands-on coaching and real-time driver development. (page 20)
3. Total carbon dioxide captured using AGI technologies is calculated by first aggregating the total volume of gas received in thousand standard cubic feet per quarter per site. Each quarterly volume is multiplied by volumetric percent of CO₂ for each respective quarter and site, expressed as a decimal fraction, and the results are summed, which results in the total volume of CO₂ received in thousand standard cubic feet. The total volume of CO₂ received in thousand standard cubic feet is converted to standard cubic meters and then multiplied by the density of CO₂ in metric tons per standard cubic meter provided in Eq. UU-2 in Subpart W of Part 98 in Title 40 of the U.S. Code of Federal Regulations to determine the total carbon dioxide captured using AGI technologies. Energy Transfer did not complete an independent third-party verification of the referenced data or emissions reduction claim. (page 22)
4. The reduction in captured CO₂ volumes in 2024 resulted from changes in gas composition related to H₂S and CO₂ injection, as well as decreased inlet volumes at one of Energy Transfer’s gas processing facilities. (page 22)
5. AGI injection wells are not permitted under EPA subpart RR. (page 22)
6. This figure does not include emissions reduction data from Dual Drive units in Virginia and Wisconsin. The emissions saved using Dual Drive Technologies is calculated by first aggregating the total motor runtime for the year with the assumption that there are no emissions associated with electricity usage. The motor runtime is multiplied by the engine design fuel usage in million British thermal units per hour for each respective Dual Drive unit, which results in the total fuel on a heat basis that would have been combusted by the engines. The total fuel on a heat basis is multiplied by the weighted U.S. average default CO₂ emission factor for natural gas from Table C – 1 to Subpart C of Part 98 in Title 40 of the U.S. Code of Federal Regulations to determine the kilograms of CO₂ saved, which is then converted to long tons. Although NOX, CO, and VOC numbers are reported in short tons, the CO₂ numbers are reported in long tons. In addition, as stated above, the CO₂ calculations are not offset by the Scope 2 emissions associated with generation of electricity used by the motors. (page 24)
